FABUWOOD SELLING CENTER

Sample Door Display

Attention Dealers:

Fabuwood is excited to present its attractive and functional sample door display. Featuring a full set of up-to-date sample doors and three installed base units that show construction quality, this door display will enhance any showroom. Although any three of Fabuwood's base cabinets are available with this display, Fabuwood recommends showcasing Galaxy Frost, Hallmark Chestnut and Fusion Blanc to make the most impact. Shipments will be arriving within the next few weeks. Amounts are limited so pre-order today.

- Measurements: Height: 92½",
- Top width: 51¾", Bottom width: 48",
- Top depth: 24¼", Bottom depth: 22¼"

Includes display unit, full set of sample doors, & three base cabinets. Knobs not included.

Q1 - Quality Sourced Lumber

This Q12 standard requires the use of carefully selected top-grade lumber, guaranteeing the finest and most dependable kitchen cabinets.

Q3 - Dovetail Construction

A process that involves plywood side panels to perfectly interlock with a solid wood face frame through corresponding dovetail grooves.

Q5 - Wooden Corner Blocks

For a cabinet to receive complete Q12 entitlement, wood must be used to help maintain structural integrity.

Q7 - Flush Fit Frames

In order to be considered Q12 compliant, a cabinet must have flush inner frames that provide an attractive appearance while giving added dimension to the internal area.

Q9 - Soft-Closing Action

Fabuwood uses the smooth-running capability and soft closing action of Blum's tandem plus blumotion hinges, providing an impeccably gentle and fluid cabinet function.

Q11 - EZ Level Drawer Fronts

To ensure proper door alignment and function, a Q12 cabinet requires an effortless system utilizing a degree of mechanical precision for installing perfectly positioned drawer faces.

Q12 - Sealed Signature

The final Q12 metric requires a thorough review at each manufacturing stage to ensure the completed product meets the provisions specified in the quality assurance system.

The 12 points of quality required to meet the Q12 standard

Q2 - Pro Touch Techniques

To fully permeate a Q12 assessment, expert finishing methods are required to heavily influence first impressions and assure a lasting finish that is easy to maintain.

Q4 - Anti-Warp Structures

The anti-warp component involves the use of plywood panels comprised of rigid reinforcement beams.

Q6 - Solid Back Builds

For superior structural longevity, this Q12 feature requires that the back of a cabinet is constructed from one piece of solid half-inch plywood.

Q8 - Finished Interiors

Treated and finished cabinet interiors are another significant feature of Q12 as they produce a clear statement of quality and attention to detail.

Q10 - Fluid Full-Extension

Cabinets built with smooth full-extension glides guarantee an enhanced running action that maximizes a cabinet's storage to its full capacity and ensures Q12 eligibility.
